

Day 1 Progress – Salesforce Developer Bridge Program

Name: Mukku Bhargavi

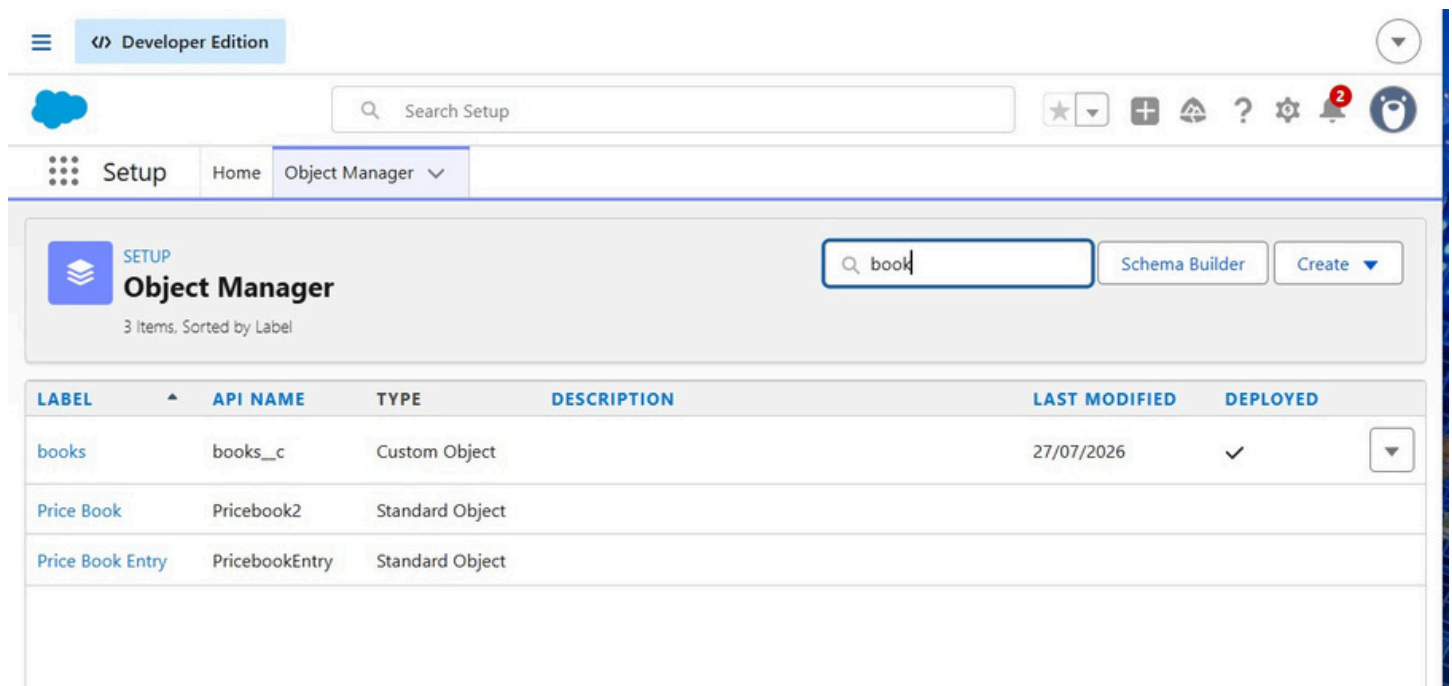

Pod Number:

Date: 28/07/2026

Task 1 – Custom Data Model

Completed:

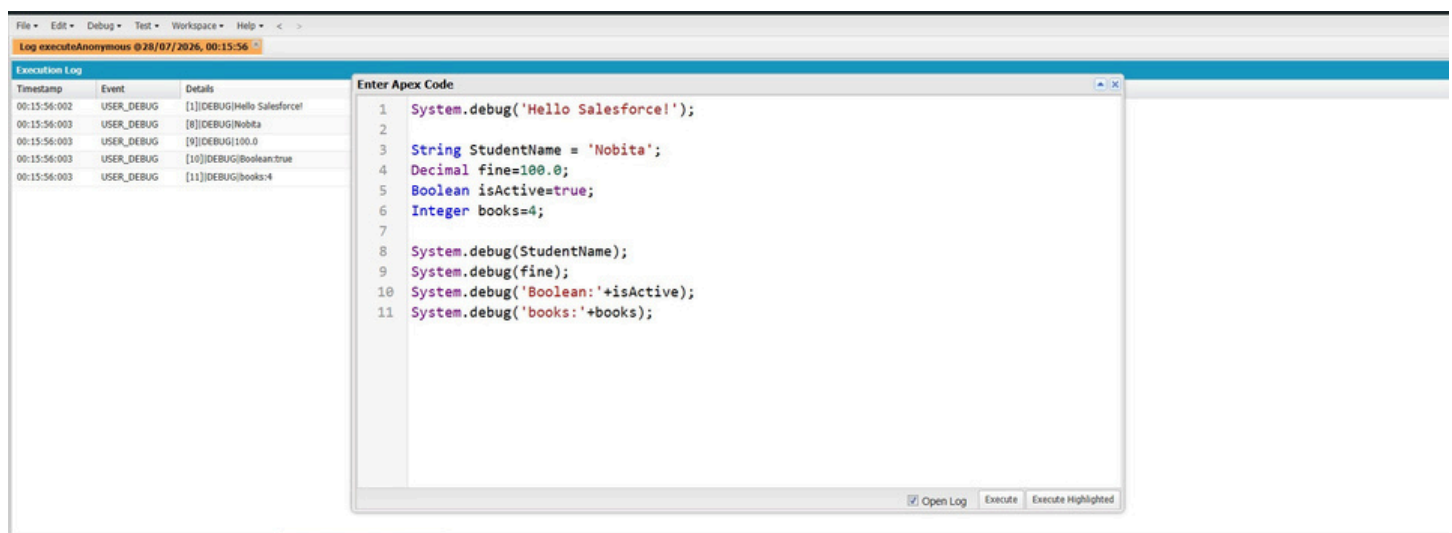

- Created all required custom objects (**Books, Member, Issue Record, and Fine**), added the necessary custom fields, and established relationships between the objects.

The screenshot shows the Salesforce Object Manager interface. At the top, there's a search bar with 'book' entered. Below the search bar, a table lists objects. The table has columns: LABEL, API NAME, TYPE, DESCRIPTION, LAST MODIFIED, and DEPLOYED. The first row is 'books' with API NAME 'books__c' and TYPE 'Custom Object'. The second row is 'Price Book' with API NAME 'Pricebook2' and TYPE 'Standard Object'. The third row is 'Price Book Entry' with API NAME 'PricebookEntry' and TYPE 'Standard Object'.

LABEL	API NAME	TYPE	DESCRIPTION	LAST MODIFIED	DEPLOYED
books	books__c	Custom Object		27/07/2026	✓
Price Book	Pricebook2	Standard Object			
Price Book Entry	PricebookEntry	Standard Object			

Task 2 – Execute Anonymous & Debug Log Practice

The screenshot shows the Salesforce IDE interface. On the left, there's an 'Execution Log' window showing a list of events. On the right, there's an 'Enter Apex Code' window with the following code:

```
1 System.debug('Hello Salesforce!');
2
3 String StudentName = 'Nobita';
4 Decimal fine=100.0;
5 Boolean isActive=true;
6 Integer books=4;
7
8 System.debug(StudentName);
9 System.debug(fine);
10 System.debug('Boolean:'+isActive);
11 System.debug('books:'+books);
```

Task 3 – SOQL Queries

Developer Console - Google Chrome

playful-badger-lku53f-dev-ed.trailblaze.my.salesforce.com/_ui/common/apex/debug/ApexCSIPage

File Edit Debug Test Workspace Help < >

Books__c@10:33 AM

Task 4 – Write a Real Trigger

Files Created

IssueSeverityHandler.apxc

IssueSeverityTrigger.apxt

```
Books_c@12:11 PM x Books_c@12:11 PM x Books_c@12:11 PM x Books_c@12:11 PM x Books_c@12:11 PM x IssueSeverityHandler.apxc x IssueSeverity
Code Coverage: None API Version: 67
2
3 // Prevent duplicate issue records
4 • public static void preventDuplicate(List<Issue_Sevirty__c> newRecords){
5 •
6   for(Issue_Sevirty__c rec : newRecords){
7
8     List<Issue_Sevirty__c> existing = [
9
10      SELECT Id
11      FROM Issue_Sevirty__c
12      WHERE Books__c = :rec.Books__c
13      AND Member__c = :rec.Member__c
14      AND Issued_Date__c = :rec.Issued_Date__c
15    ];
16
17    if(existing.size() > 0){
18      rec.addError('Duplicate Issue Record Found.');

38        issue.Returned__c = true;
39        issue.Return_Date__c = Date.today();
40        update issue;
41        Test.stopTest();
42    }
43 }
```

Task 5 – Build One Simple Lightning Web Component (LWC)

Completed:

Developed a simple **Lightning Web Component (bookList)** to display records from the **Books** custom object.

```
File Edit Debug Test Workspace Help < >
